Time Pilot - KLOV/IAM 5 Point User Score: 3.50 (14 votes) Personal Impressions Score: 3.70 Total Like: 4.08 Fun (Social): 3.08 Fun (Solo): 3.92 Collector Desire: 2.69 Technical Impressions Score: 3.49 Gameplay: 4.14 Graphics: 3.69 Originality: 3.67 Sound/Music: 2.92Human Impressions and technical impressions each account for half of the total score. In the category of Personal Impressions, I like it a little more weight than other factors. Log in to rate this game! Type/Upright/Standard (2274 - TNT Amusement) Game HomeYou plane is a sleek jet that travels to five different time eras, each with different enemies. The time periods are as follows:1910 biplanes and biimp1940 World War II monoplanes and B-251970 helicopters1982 or 1983 year differ between rom versions of jets and B-522001 UFOs.In the first four eras, the background setting is the sky with clouds, but in the fifth era there is a background space with asteroids. PlayDuring the waves with rockets such as helicopters and jets close turns with many double-back action will make attacking missiles mostly useless. Focus on shooting down an entire squadron whose appearance is signaling a siren sound to put together bonus points. You can also save flying skydivers as you battle enemies. You have to destroy 56 normal ships in order for motherhood to appear, then you have to destroy motherhood by shooting it with seven direct hits. After you have destroyed motherhood, all Other ships will be destroyed and then your plane will advance to the next time period. Once you get through all five time periods, the game will start again with increased difficulty. Miscellaneous licenses: KonamiMany home versions for 1980s gaming systems and computers are the best translation probably is the ColecoVision version. VAPS Arcade / Coin-Op Time Pilot CensusThere are 11,306 members of the Video Arcade Conservation Society/Vintage Arcade Conservation Society, 9,004 who participate in our arcade census project owned, wanted, or for sale. Census data currently includes 151,222 machines (6,501 unique titles). Very common – There are 331 known instances of this machine owned by Time Pilot collectors who are active members. Of these, 186 are original specialized machines, 22 of which are conversions in which the game circuit boards (and possibly cabinet graphics) have been placed in (and beyond) other game boxes, and 122 of them are the only circuit boards that the collector could put into general case if necessary. For Sale - There are 11 active VAPS members with Time Pilot machines for sale. There are 7 active VAPS members with extra time pilot circuit boards for sale. Wanted - Popular - There are 21 active VAPS members currently looking for Time Pilot. There is one active member of VAPS looking for a Time Pilot printed circuit board set. This game ranks 77 on a scale of 100 (100 = most often seen, 1 = least common) in popularity based on the census of property records. This game ranks 35 on a scale of 100 (100 = most commonly wanted, 1 = least common) in popularity based on the census you want to list records. Rarity and popularity independently are not necessarily signs of value. [More information] TechnicalThe game uses two Microprocessors Z80 and two AY-3-8910 PSGs for sound. TriviaV version of Konami, the fourth era is 1982, while in Centuri licensed version, the fourth era is 1983.This game was designed by Yoshiki Okamoto. He was hired by Konami as a graphic designer, although not long after he was hired he was asked to design a car simulator video game. He didn't like the idea of driving the game, but he liked the Bosconian game a lot, so he decided to base his game on Bosconian without saying his boss. He was also smart enough to know he would get in trouble for it so he also had his design team simultaneously create code to manage the game too if his boss wanted to see it. When his boss asked if the motor game was finished, Okamoto showed him the Time Pilot instead and his boss got angry. Okamoto asked him to do a position test and the game was taken well and the rest is history. Okamoto designed only two games while at Konami: Time Pilot and Gyross. He later went to Capcom, where he designed the 1942 Final Fight and Street Fighter series of games. This is a sequel to the original classic spaceship shoot'em up, but in this game you play the pilot once more, but in more future such as stages and you get to use eight joystick modes for a better maneuver ship. 1 on Stock Description More Information Review (0) Here's Time Pilot 84 Arcade Game For Sale. This is a sequel to Time Pilot. This is a shooting game arcade game that has a futuristic alien city of scapegoats and also uses an eight way joystick this time. Not like the original Time Pilot, where every year he told you that you are level. In this version, new time periods are shown with new enemies and different colors. Only signed-in customers who have purchased this product can leave reviews. Christmas 2020 We are now closed until Monday 4 January. All placed orders will be processed as soon as we return in the new year. Merry Christmas to you all, and thank you to all our customers who have supported us during a difficult year. Based in the UK we supply printed reproduction and original and custom arcade cabinet artwork for modern and vintage video games, from 70's and 80's classics like Star Wars, Pac-Man, Dig Dug & OutRun, up to 90's & 00's games like Sega's Afterburner, OutRun 2, Daytona USA & Initial-D. We also offer a selection of Japanese Candy Cab artwork for arcade cabinets such as Taio Egret II, Sega Astro City and Naomi's Closets and have artwork for many UK built machines such as Electrocoin Goliath Chase HQ as well as Atari Ireland/Euro Cab Cabins Dig Dug, Time Pilot and Pole Position II, which have different art from their US versions. All art is reproduced from purified high-resolution scans or vector works of art. Many of our pieces are exclusive reproductions not available anywhere else. We ship artwork anywhere in the world, and have customers in the US, Australia, Japan and across continental Europe. The art is printed on a variety of premium quality materials using the 64-inch wide Roland VersaCAMM V5-640, 8 inks always in the highest possible quality. We use premium vinyls from Mactac and Orca! for our vinyl work, and can protect prints with 3 different texture classes of matte laminate or high-gloss coating. Flexi awnings are printed on a thick heat resistant backlight film, made to look vibrant and bright when lit from behind. We also print on a solid 5mm foam plate for toppers, flexible PVC boards and can have any piece of artwork die-cut on any shape needed on any medium using our CNC machine. For perspex awnings and frames we use Fuji Acuity Select Flat with UV inks to directly print on plexi – no reverse mounted stickers here! These are incredibly good quality with super thick ink, and are as close as you can possibly get to the quality of your digital print screen. We have a library of literally thousands of pieces of arcade artwork, with new pieces being added all the time – if you can't see what you're looking for, please get in touch as we probably have! We may also provide custom design work for a fixed fee, drop email to mail@arcadeartshop.com or through the Contact Us page and we will be happy to discuss ideas and costs. Thanks for visiting arcade art shop. Trade.
